

# 'How To' Connect to WiFi - Apple

## Step 1 - Connect to the Student WiFi

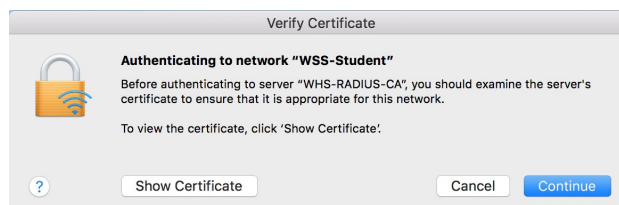

- 1) Click on the 'WiFi' icon and select 'WSS-Student'

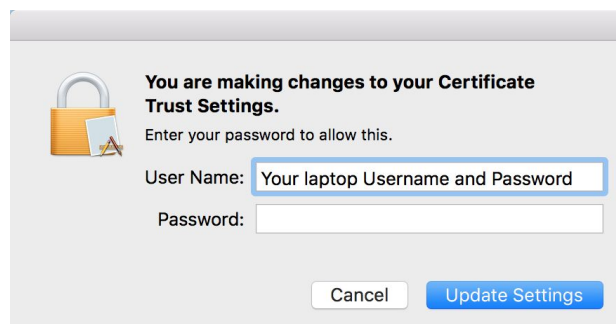

- 2) You will then need to enter a username and password and click 'Join'
  - a) **Username:** firstname lastname
  - b) **Password:** student ID

- 3) You will see the following window, click continue

- 4) Finally, you will be asked to enter your Computers Password.

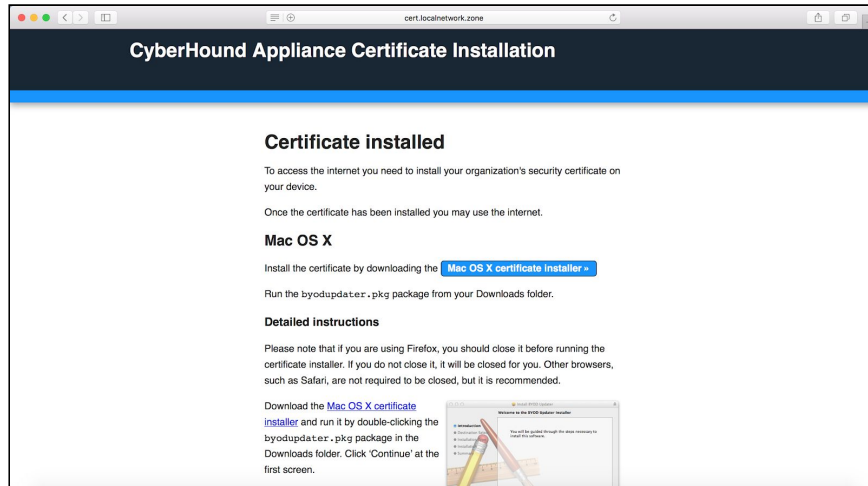

You are now connected to the WiFi

(PTO)

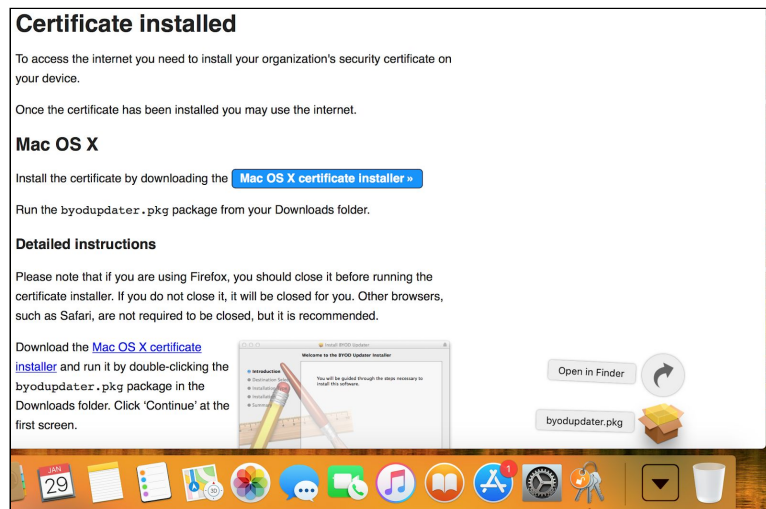

## Step 2 - Connect to the Internet

- 1) Open a web browser (Safari, Google Chrome etc..) and it should redirect you to **cert.localnetwork.zone** (The Image below)

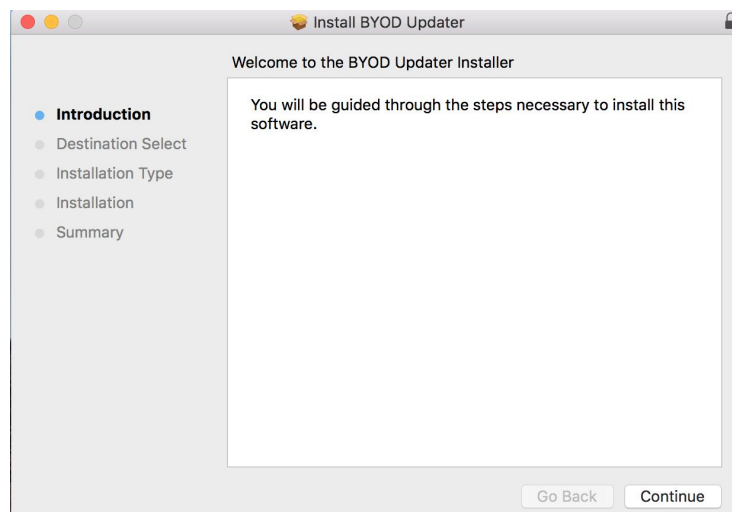

If you don't see this page, try going to a website (google.com, youtube.com, apple.com for example)

- 2) When you see this page, you will need to click on '**MAC OS X Certificate Installer**' to download the file.
- 3) Once downloaded, open '**byodupdater.pkg**' from your downloads folder.

- 4) Follow the prompts to finish the installer.

- 5) Once completed, you can select '**Move to Trash**'.

You are now connected to the Internet.
